**1.0.Introduction:-** The goal of human life is very important, since our earth was created. According to Dr.A.P.J.Abdul Kalam, he gave so many inspirational speeches and written so many books for the better future for the people. One of his books inspired me, and gave me enthusiasm to build the character that is (learning how to fly). The lecture that he gave us, the moment that he expresses, will definitely inspire the young. He recognises us the concept of “ignited mind”. The man will reveal his thoughts and new ideas, when he puts ignite in mind. The development starts from thinking in ourselves in a particular way by creating, by acquiring knowledge from books and from our ancestors. The concept tells us, the wings that we have not to relax, but doing hardwork with great compassion. Hardwork is best example for nothing to something. Dr A.P.J.Abdul Kalam was the scientist, aeronautical engineer, and 11<sup>th</sup> president of India on 25<sup>th</sup> July 2002, these all great professions earned by him by his hardwork and always kept ignite in mind on his life journey.

The reality of human aim in life is to develop the activities in day-to-day life, not by saying I will fly. When doing hardwork, we may fail so many times and lose our energy, for the best example is “Thomas Alva Edison he failed 2,774 times according to his records and reached a working design of an electric bulb, according to his path, failed and failed and at last he reached his goal with great enthusiasm. Dr.A.P.J.Abdul Kalam, how he is expressing the concepts to the youth, and how we have to grow and put ignite in our minds and fly higher and higher. It is my great pleasure to inform you by this research objective.

### **2.0. Key words:-**

Enthusiasm, ignite, supremacy, harmony, righteousness, accomplished, integrity, influence.

### **3.0. culture of supremacy:-**

In every work that we do, there will be good and bad, struggles, distress on work what we do. In many cases we get work from teacher as being a student, we get work from principle as being a teacher, and get work from bank manager as being a clerk etc.. here we should understand the value of time, and bring the best in ourselves by the positive way of thinking. The excellence comes out, when we do the things innovating and creatively. The people around you may think in a same manner, but among those people you have to think in different way and creative way, then excellence will bloom like a flower early in the morning. The excellence is the process of the individual creativity and innovation to be the better in oneself. The way Dr.A.P.J.Abdul Kalam did his hardwork in system development,

was inspired not only Srinivasan (the manager of system integration), the hardwork that he did still it is inspiring the youth to grow in excellence.

#### 4.0. Born your minds with righteousness:-

Today Dr.A.P.J.Abul kalam is telling, how the ignite minds of the young will born like a fire in society and bring happiness in oneself. In this competitive world, our aim should be focus on our goals with great hardwork and enthusiasm. Dr.A.P.J.Abdul Kalam is expressing about righteousness with great heart for the development for the youth.

“Where there is righteousness in the heart,  
there is beauty in the character.  
When there is beauty in the character ,  
There is harmony in the home.  
When there is harmony in the home,  
there is an order in the nation.  
When there is order in the nation,  
There is peace in the world.”<sup>1</sup>

When we talk and walk in the righteousness, the people around us may get angry and they may throw stones at you, they may speak vulgar words on you. But we know that what we are, and what is our character. In human life that is common in every situation, in order to think about those unnecessary things, we have to cultivate the habit of righteousness in the heart, in the home, and in the nation. The great people have this type of character, mainly for A.P.J. Abdul Kalam has the righteousness in the heart, for his righteousness in the heart, there is a beautiful character, harmony, order in the nation, and the peace in the world.

#### 4.0. Search for the greatness of knowledge:-

Knowledge comes from, in different types like from news papers, radios, by watching television, mainly by from books. The knowledge gives us the creativity to do the other things with knowledge. “ Teacher can influence students not only by teaching but by also

giving practical lessons in human values, particularly by their selfless giving of knowledge”<sup>2</sup> Searching for knowledge is nothing but gaining knowledge in everywhere. In every day to day life we are getting knowledge from books and by teacher, the knowledge we are gaining , we have to put it on the practice. knowledge is the powerful weapon, the practical knowledge gives us the more understanding on the subject. when A.P.J. Abdul kalam was studying the subject of aeronautical engineering, he was not able to understand those information, when he put it in the practice, then he realised, the knowledge is in the practical way. Many inventors were gained knowledge by the practical way by inventing things. The mind of human is, by seeing the bird flying, wright brothers were invented aeroplane by using with great knowledge, and so many inventions were accomplished by the great knowledge.

## 5.0. I have wings to fly:-

When we listen the greatness and success of the people, we get some type of feeling that we have to achieve success. But most of the times we say I need success in life, but we can't do hardwork on it, not by recognising in mind I have wings to fly for the success, we have to put it in the practice and that should become reality in our life. The success is waiting for us "The challenge, my young friends, is that you have to fight the hardest battle, and never stop fighting until you arrive at your destined place. What will be the tools with which you will fight battle? There are: have a great aim in life, continuously acquire the knowledge, work hard and persevere to realize the great achievement"<sup>3</sup>

My dear friends most of the times we are discouraging ourselves, that we have no wings and we can't achieve anything in life, but in every human being there is its own talent in there heart. Dr. A.P.J. Abdul kalam was telling the great quotation, that how we have to fly,

“Learning gives creativity,  
Creativity leads to thinking ,  
Thinking provides knowledge,  
Knowledge makes you great”<sup>4</sup>

This is how we have to fly with creativity, thinking, knowledge, and we have to include our hardwork also. A.P.J. Abdul kalam was telling aimig small is a crime, dream big fly and achieve the goal.

## 6.0. Conclusion:-

Dr.A.P.J.Abdul kalam has written this great book (LEARNING HOW TO FLY) for the growth of the young. Man should work for his goal and we have to promise to him that, we have a goal , we are meant for doing hard work not for wasting time, time is very precious to achieve the great success. The young people should inspire his wonderful message and fly for the betterment for the future. From now onwards create the main motto for your life, and heartfully receive the success. Fly with integrity and be a unique personality.
